Education

Northeastern University, Boston – MS in Computer Software Engineering | GPA: 3.7/4.0 Expected Dec 2026

Courses: Data Structures & Algorithms, Cloud Computing, Software Engineering, Advanced Web Architecture

Certifications: AWS Solutions Architect - Professional, AWS Certified Developer - Associate

Experience

Software Engineer, Dassault Systemes – Boston, MA June 2025 – Jan 2026

- Developed a highly interactive, responsive stakeholder dashboard using React.js and TypeScript, serving 8M+ users on the 3DEXPERIENCE platform
- Achieved a 70% reduction in First Contentful Paint (FCP) and improved Core Web Vitals by implementing lazy loading, code splitting via Webpack, and optimizing DOM manipulation
- Maintained 99% frontend test coverage across UI components using Jest, React Testing Library, and CI/CD
- Accelerated data delivery by 25% for a real-time virtual companion module used by 3,000 clients, leveraging WebSockets, GraphQL, and React (JavaScript) to streamline real-time asynchronous data flows

Software Engineer, London Stock Exchange Group – Bangalore, India July 2022 – Aug 2024

- Architected a scalable micro-frontend architecture using React, Next.js, and Module Federation to modernize a legacy anti-corruption platform for 400K+ users
- Engineered highly reusable, accessible (WCAG compliant) UI component libraries using Storybook and Tailwind CSS, resulting in a 200% increase in feature delivery speed across frontend teams
- Boosted client-side rendering speed by 90% for 500+ analysts by designing efficient global state management with Redux Toolkit and implementing custom React Hooks
- Resolved 20+ production issues through Root Cause Analysis and custom React/Node.js monitoring dashboard, authored technical runbooks to enable knowledge sharing and reduce recurring incidents by 75%

Projects

GoonedIn goonedin.com

- Resolved fragmented user experiences by developing a seamless, Single Page Application (SPA) using Next.js, TypeScript, and Framer Motion for fluid page transitions
- Optimized system efficiency and reduced API overhead by implementing a global PostgreSQL caching strategy and a sequential queuing system for structured job analysis
- Architected a real-time dashboard to provide instantaneous job updates, implementing a WebSocket communication layer with Zustand for lightweight, responsive state management

NEU Personalized AI Academic Advisor GitHub

- Simplified academic planning for students by building a vector similarity search engine and React UI to extract information from 500+ unstructured academic PDFs and HTML documents
- Increased recommendation accuracy by achieving a 95% relevance score through the implementation of a semantic matching algorithm using Python, Node.js, LangChain, and Pinecone

Skills

Language: JavaScript (ES6+), TypeScript, HTML5, CSS3, SASS/LESS

Framework/Library: React.js, Next.js, Vue.js, Redux, Zustand, Tailwind CSS, Material-UI, Bootstrap, WordPress

Web Technologies: Webpack, Vite, Babel, DOM Manipulation, RESTful APIs, GraphQL, WebSockets, Responsive Design, Web Accessibility (WCAG)

Tools: Jest, Cypress, React Testing Library, Git, NPM/Yarn, Figma, Chrome DevTools, Vercel
